Master Data

Comprehensive data about companies and persons.
In addition to address and contact data, official commercial register details, sector allocation including business purpose, and important key company figures are clearly displayed.

Network

Visualization of P2C and C2C connections as a network.
In clear graphs both current and historical relationships are displayed, such as decision, control and supervisory functions or shareholdings, contracts and economic authorizations.

Structure

Visualization of ownership relationships as tree diagrams.
Direct shareholdings in or from other companies are displayed as hierarchical shareholder structures, which can be further expanded by double-clicking on selected nodes.

Ultimate Beneficial Owner

Determination of beneficial owners including investigation path.
Economically entitled persons are highlighted in color in the shareholder structures of companies. The investigation path, if necessary across several levels, is also displayed in the hierarchical structure. The threshold values of 10% or 25% can be set individually.

Shortest Path

Variants of shortest contact paths to targets.
Intelligent rule sets use your personal contacts and network relationships to determine the shortest contact paths to target customers. These rules have a maximum of four levels, and if there are several paths, the strongest paths can be determined via filter options.

PALTURAI EXPERIENCE FOR WEB

All features at a glance (2/2)

Monitoring Service

Push message service to subscribed business partners.
Important business events are delivered immediately by e-mail and displayed on the start page. These include changes in management, shareholders, master data or company status.

Network Risks

Overview of risky partners in the environment.
Business partners with risk information such as insolvency, trouble spot or country risk as well as inactive partners are identified and listed. Applies to direct connections as well as to indirect (2nd level network).

Search

Targeted search for companies and persons.
Numerous search filters and user-friendly help functions support both the targeted search for companies and persons. The creation of lists (e.g. lead lists) is supported with individual selections with numerous parameters.

Publications

Commercial register notifications and annual reports.
All publications of the Commercial Register are sorted chronologically and categorized. The annual reports are available for download in HTML or CSV format.

Tagging

Customized marking of business partners.
The colored markings of important business partners (e.g. customers, suppliers, leads or "trouble makers") make the various graphs and tables more informative and clearer. Tags also support our algorithms, such as the Shortest Path.
